Background

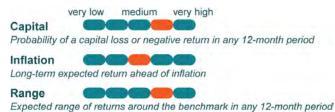

THIS PORTFOLIO PRICING IS ONLY AVAILABLE FOR THE RETIREMENT INCOME SOLUTION

Portfolio description

The primary objective of a retirement fund is to replace one's salary on retirement. A Net Replacement Ratio (NRR) is used to measure the percentage of final pensionable salary that can be obtained by purchasing an annuity that will provide a guaranteed inflation-linked income stream for life. An NRR of between 60%-75% is generally accepted to provide the required income for most people to maintain their existing lifestyles supported by their salaries. This may vary from individual to individual, depending on his/her needs and circumstances.

An AF LifeStage retirement solution is a dynamic investment strategy designed towards achieving this objective. The AF LifeStage solution has 2 distinct phases: Accumulation of assets (30-40 years), and preparing towards retirement (5-7 years prior to retirement). The AF Passive Bold portfolio is designed for the accumulation phase of retirement savings. It has been designed to be part of the AF Passive LifeStage retirement solution.
