

BALANCED GROWTH PORTFOLIO

MARCH 2023

About the portfolio

The Balanced Growth Portfolio is a market related portfolio that aims (but does not guarantee) to provide a return that exceeds inflation by 5.5% per annum net of fees over measurement periods of longer than seven years. The portfolio is most suitable for members that have a long term investment horizon and whose objective it is to earn a return that exceeds inflation over the long term.

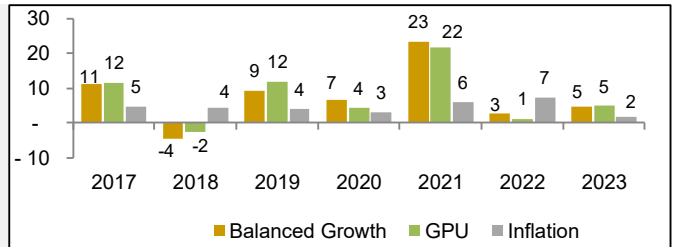

The Balanced Growth Portfolio is diversified in nature and has a high exposure to growth assets (such as South African and global equity) and investment returns are likely to be volatile. Large positive or negative returns are possible, particularly over short periods. This investment approach requires members to have the courage and patience for long term investing and not to be unsettled by short term fluctuations in performance compared to the peer group.

The Balanced Growth Portfolio's assets are managed by specialist and balanced (or multi-asset) mandates run by South African and global asset managers.
